# How to unlock further IFIs finance for solutions?

**United  
Nations**

Office of the Special Adviser

# OSA Development Finance: Focus on IFIs

The focus on IFIs is for Sovereign Finance & Private Sector Finance

IFIs have responded very positively to our engagement across the board at local and HQ levels

IFIs do not have disaggregated data about their investments for IDPs beneficiaries

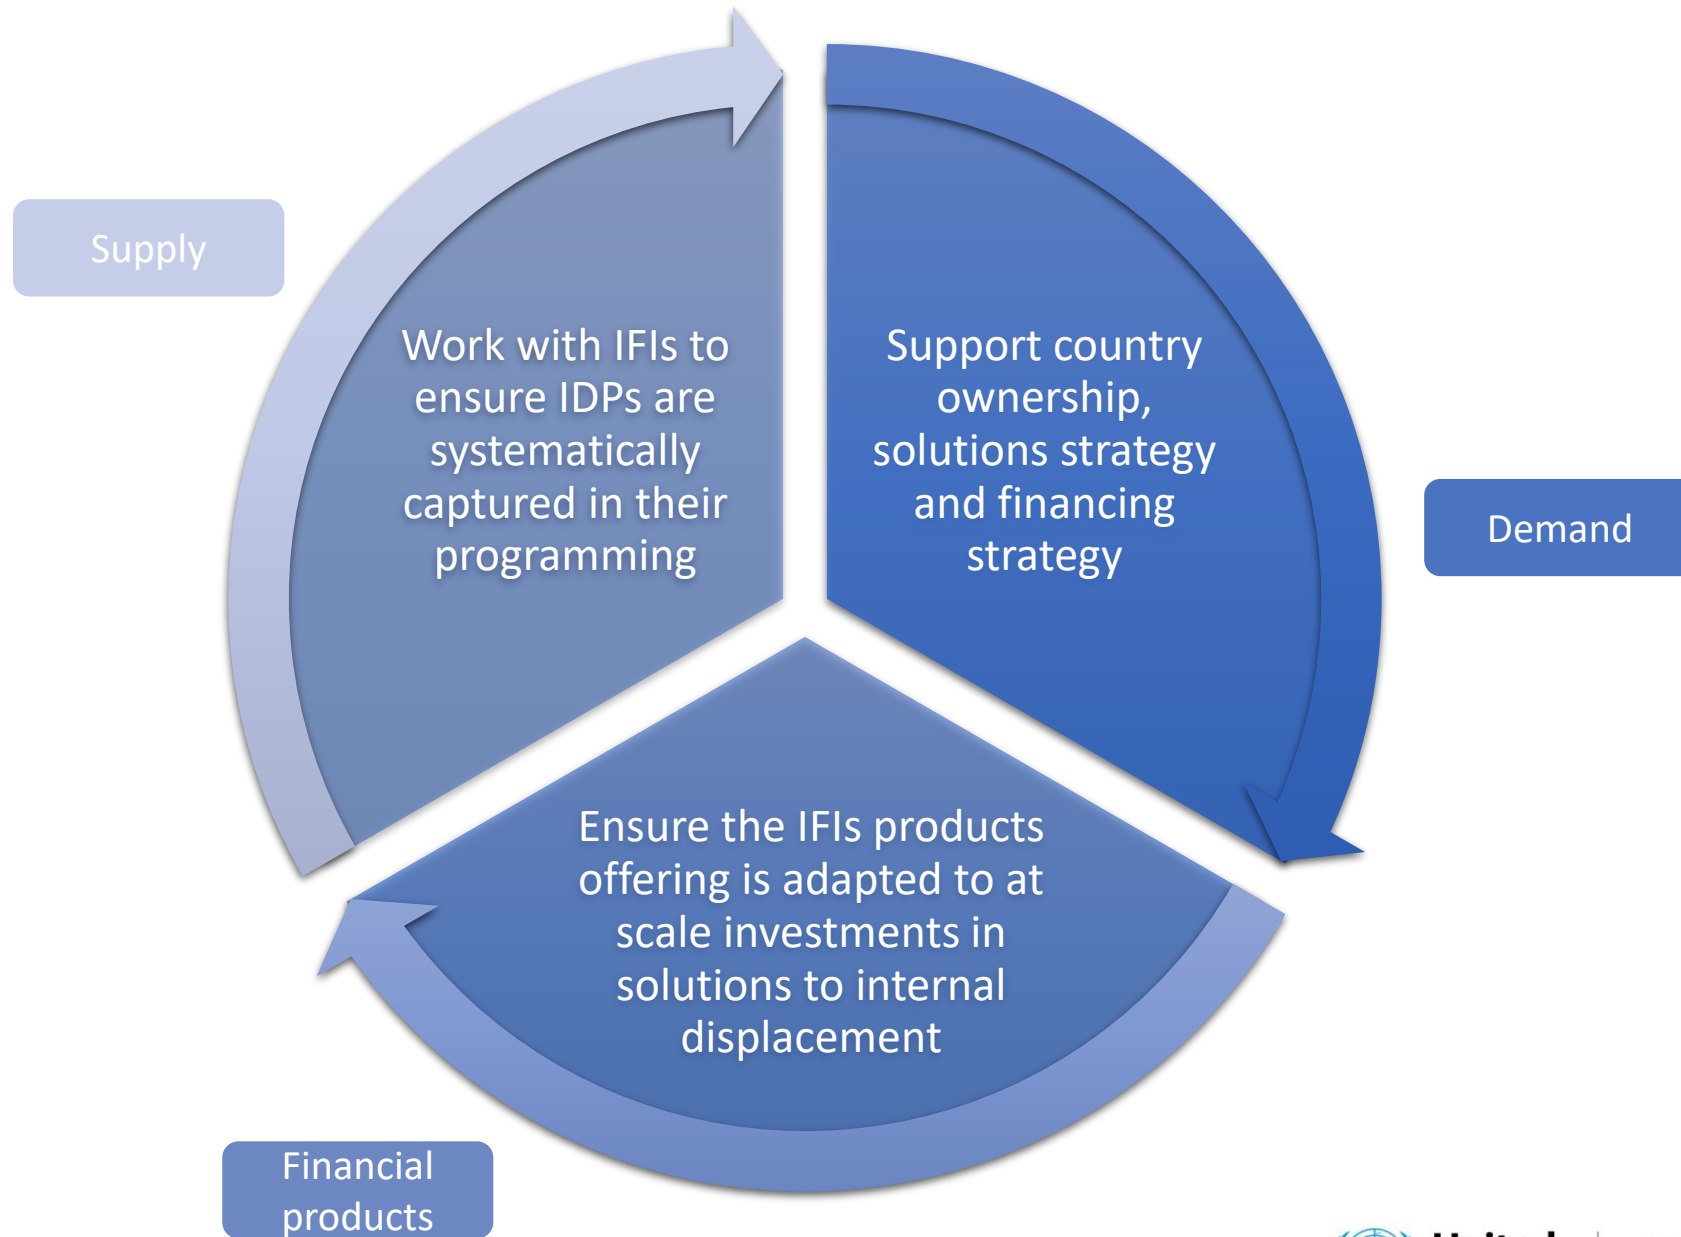

IFIs are in a position where they welcome further learning on the internal displacement issue

**United  
Nations**

Office of the Special Adviser  
on Solutions to Internal Displacement

# Urban/Housing Finance – Few Key Questions to Consider?

What data we to unlock further investments for urban planning and housing?

What is the potential of private sector (local)?

How can we work further on the land issue and land value capture?

Where can technical assistance be key support to provide to countries?

How do IDPs intention (return, settlement, re-settlement) impact investment decisions?

What is the role of private sector IFIs? (risk appetite, transaction costs)

What level of subsidies do we need for housing depending on the context?

Housing vs Shelter?

Housing or Compensation?
